Summary:

I am a Southern California-based Web Developer, with experience working in HTML, CSS, JavaScript, jQuery, Ruby on Rails, Bootstrap and React. I have been using these experiences to produce several online apps that showcase my creativity and imagination. Before becoming a developer, I worked for a tech startup on a brand-new app. I was in charge of managing and editing the app's content, and came to understand the multitude of challenges and opportunities present in the tech world. I'm currently working on a new app called QuestionThis, a Q&A application using React, Express, MongoDB and CSS.

Technical Skills:

Languages: HTML, CSS, JavaScript, Ruby, PHP **Front-end-Libraries:** jQuery, Bootstrap, SASS

Web Application Frameworks: Ruby on Rails, Express, Node, React.js, Angular

Version Control: Git/GitHub, Heroku **Databases:** PostgreSQL, MongoDB

Projects:

Riddle Me This

A multiple-choice puzzle game designed for two players and developed in three days. Made with HTML, CSS, JS and jQuery.

FanLife

An application created in four days, FanLife allows users to comment and favorite their favorite shows and movies.

Developed with Ruby on Rails, Bootstrap, CSS and SQL.

MovieTroll

MovieTroll is an application for movie critique and review. This application was developed as a group. I was in charge of creating the comment section, as well as the CSS/Bootstrap styling.

Developed on Node, Express, MongoDB, HTML, and CSS.

QuestionThis

QuestionThis is the latest question and answer application on the web. This app was made out of HTML, React.js, Express, MongoDB, and Node.js.
